# Site Assessments of Rejected Green Belt Sites for Broad Location 7

## **Cambridge City Council / South Cambridgeshire District Council**

To be accompanied by a table which identifies how it provides /encompasses both LPA's SA and SHLAA assessments. Text in italics are officer prompts to be deleted on completion.

## Green Belt Site and Sustainability Appraisal Assessment Proforma

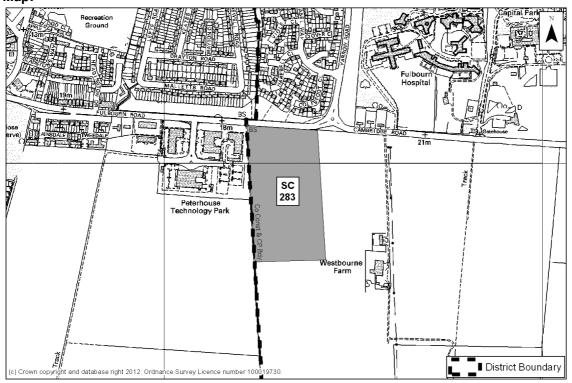

Site Information Broad Location 7, Land between Babraham Road and Fulbourn Road

Site reference number(s): SC283

Site name/address: Land south of Cambridge Road Fulbourn, Cambridge

Functional area (taken from SA Scoping Report): N/A in SCDC

#### Map:

**Site description:** Arable fields, some with hedges and trees, to the south of Cambridge Road. The land rises up to the south towards the Gog Magog Hills. Overlaps SHLAA site 911 in Cambridge. Adjoins sites 283.

Current use(s): Agriculture Arable Crop

**Proposed use(s):** Part of a much larger site including land in Cambridge City Council's area for an urban extension to Cambridge comprising approximately 2829 dwellings, R&D employment, neighbourhood centre and public open space (24.92 hectares is in South Cambridgeshire, provisionally 712 dwellings)

Site size (ha): South Cambridgeshire: 6.62 ha

Assumed net developable area: 3.31-4.96ha (assuming 50% net or 75% net)

Assumed residential density: 40dph in SCDC

Potential residential capacity: 132-199 Site owner/promoter: Owners known

Landowner has agreed to promote site for development?: Yes

Site origin: SHLAA call for sites

#### Relevant planning history:

2003. The Structure Plan panel Report considered the release of land at Netherhall Farm and concluded that "studies consistently reject this location due to its contribution to the Green Belt. We heard nothing to persuade us to form a different view. Nor did we hear anything to convince us that there were other considerations of sufficient weight to override the harm that strategic development in this location would have on Green Belt purposes."

2006. Proposals put forward through the 2006 Cambridge Local Plan: land adjoining Peterhouse Technology Park proposed for housing / employment was dismissed by the Inspector on grounds that the land was located within the Green Belt, was open land outside the urban area, was not needed to supply housing, and that land should not be released to satisfy a possible shortage of employment land on an ad-hoc basis. Netherhall Farm was found to be a sustainable location for development but dismissed because of its importance to the setting of the City and there was no need to release from the Green Belt to make up the supply of housing for Cambridge. The Inspector concluding: "Even if development were to be limited to the western part of the site, the open land of that part of the site would be lost, and this land is well seen in the foreground in views from Lime Kiln Hill and Worts Causeway. The land is seen more distantly in views from the Gog Magog Hills. In some of the relevant views the site is part of the green foreground in wider prospects over the urban area. The site is important to the setting of the City and should remain part of the Green Belt."

There are no significant planning applications.

Level 1		
Part A: Strategic Considerations		
Conformity with the Council's	Sustainable Development Stra	ategy (SDS)
Criteria	Performance (fill with relevant colour R G B or RR R A G GG etc and retain only chosen score text)	Comments
Is the site within an area that has been identified as suitable for development in the SDS?	R = No G = Yes	
Flood Risk		
Criteria	Performance	Comments
Is site within a flood zone?	G = Flood risk zone 1	Green: The location lies entirely within Flood Risk Zone 1 (the lowest level of river flood risk).
Is site at risk from surface water flooding?	G = Low risk	Green: No surface water issues. Development should be mindful of potential flow routes from adjacent high land to south
Green Belt		
Criteria	Performance	Comments
What effect would the development of this site have on Green Belt	See below	The site is located on open, rising ground. The southern part of the site would be

purposes, and other matters important to the special character of Cambridge and setting?  To preserve the unique	Distance from edge of the	very visible and negatively impact the purposes of Green Belt. The northern part of the site could be mitigated if developed. See site 300. If development were confined to the northern part of the site only i.e. at the 20m contour, it might be suitably mitigated and therefore have a low impact on the purposes of Green Belt.  Red: The visibility of the site
character of Cambridge as a compact and dynamic City with a thriving historic core	defined City Centre to approximate centre of site is 5Km	would worsen the negative effect on perception of City as compact.
To prevent communities in the environs of Cambridge from merging into one another and with the City.	A = Some impact, but capable of mitigation	Amber: The proposed development site would extend up the easternmost slope of the Gog Magog hills. There would be effect on coalescence.
To maintain and enhance the quality of the setting of Cambridge	R = High/medium impacts	Red: The setting of the City would be negatively impacted by any development on the southern part of the site by compromising the openness of the area, interrupting views over the city and have a negative impact on setting.
Key views of Cambridge / Important views	R = Significant negative impact from loss or degradation of views.	Red: There are open views of the site and the City from the west and south.  Existing clear views to historic and collegiate core of the City would be severely negatively impacted if development occurred on the site.
Soft green edge to the City	R = Existing high quality edge, significant negative impacts incapable of mitigation.	Red: The existing soft green edge would be negatively impacted.
Distinctive urban edge	G = Not present	Green: No effect on distinctive urban edge.
Green corridors penetrating into the City	G = No loss of land forming part of a green corridor / significant opportunities for enhancement through creation of a new green	Green: Site is not close to recognised green corridor.

	corridor

Safety Zone (PSZ) or	restriction in comments)	consultation on any
Safeguarding Zone?		structure greater than 10m
		AGL.
Is there a suitable access to	A = Yes, with mitigation	Amber: Yes, with mitigation.
the site?		
= ==		

		Technically it would be possible to provide access. The internal roads to Peterhouse Technology Park are private and may not have been constructed to the Highway Authority's requirements.
Would allocation of the site have a significant impact on the local highway capacity?	A = Insufficient capacity.  Negative effects capable of appropriate mitigation.	Amber: Insufficient capacity. Negative effects capable of appropriate mitigation.
		This site is of a scale that would trigger the need for a Transportation Assessment (TA) and Travel Plan (TP), regardless of the need for a full Environmental Impact Assessment.
		S106 contributions and mitigation measures will be required where appropriate. Any Cambridge Area Transport Strategy or other plans will also need to be taken into account.
Would allocation of the site have a significant impact on the strategic road network capacity?	A = Insufficient capacity.  Negative effects capable of appropriate mitigation.	Amber: Insufficient capacity. Negative effects capable of appropriate mitigation.
		With regard to the A14 the Department for Transport announced in July that the A14 improvement scheme has been added to the national roads programme. Design work is underway on a scheme that will incorporate a Huntingdon Southern Bypass, capacity enhancements along the length of the route between Milton Interchange to the North of Cambridge and Huntingdon, and the construction of parallel local access roads to enable the closure of minor junctions onto the A14. The main impact, in relation to Grange Farm and other

		potential Local Plan sites, is that existing capacity constraints on the A14 between Cambridge and Huntingdon will be removed. The funding package and delivery programme for the scheme is still to be confirmed, and major development in the Cambridge area, which will benefit from the enhanced capacity, will undoubtedly be required to contribute towards the scheme costs, either directly or through the Community Infrastructure Levy. The earliest construction start would be 2018, with delivery by the mid-2020s being possible.
Is the site part of a larger site and could it prejudice development of any strategic sites?	A = Some impact	Amber: Site SC283 is closely related to South Cambs SHLAA Sites, SC111 and SC284. Site SC283 could be accessed off of Fulbourn Road as a free standing development. Also adjacent to City Council site CC911.
Are there any known legal issues/covenants that could constrain development of the site?  Timeframe for bringing the site forward for	G = No  G = Start of construction between 2011 and 2016	Green: None known that would delay development coming forward. The site is in multiple ownership.  Green: Start of construction between 2011 and 2016
development?  Would development of the site require significant new / upgraded utility infrastructure?	A = Yes, significant upgrades likely to be required, constraints capable of appropriate mitigation	Amber: Electricity - Not supportable from existing network. Significant reinforcement and new network required.
		Mains water - The site falls within the Cambridge distribution zone of the Cambridge Water Company (CWC), within which there is a minimum spare capacity of 3,000 properties based on the peak day for the distribution zone, less

		any commitments already made to developers. There
		is insufficient spare capacity
		within the Cambridge
		distribution zone to supply
		the total number of
		proposed properties which could arise if all the SHLAA
		sites within the zone were
		to be developed. CWC will
		allocate spare capacity on a
		first come first served basis.  Development requiring an
		increase in capacity of the
		zone will require either an
		upgrade to existing
		boosters and/or a new storage reservoir, tower or
		booster plus associated
		mains.
		Gas - Cambridge is
		connected to the national gas grid. A development of
		this scale would require
		substantial network
		reinforcement.
		Mains sewerage - There is
		sufficient capacity at the Cambridge works to
		accommodate this
		development site. The
		sewerage network is
		approaching capacity and a pre-development
		assessment will be required
		to ascertain the specific
		capacity of the system with
		regards to this site. If any mitigation is deemed
		necessary this will be
		funded by the developer.
Would development of the	A = School capacity not	Amber: County Education
site be likely to require new	sufficient, constraints can	comments awaited. Expect

## **Cambridge City Council / South Cambridgeshire District Council**

## Green Belt Site and Sustainability Appraisal Assessment Proforma

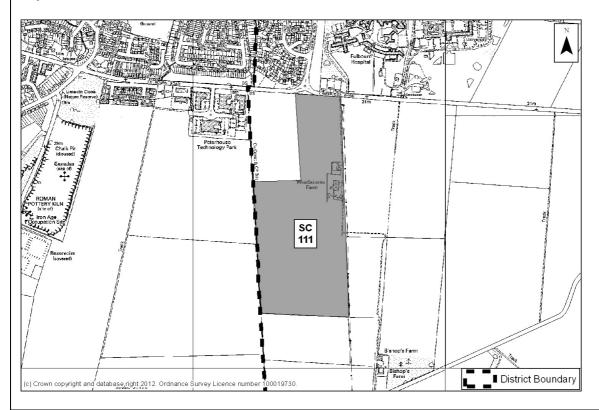

Site Information Broad Location 7, Land between Babraham Road and Fulbourn Road

Site reference number(s): SC111

Site name/address: Land south of Cambridge Road Fulbourn, Cambridge

Functional area (taken from SA Scoping Report): South Cambridge

Map:

**Site description:** Arable fields, some with hedges and trees, to the south of Cambridge Road. The land rises up to the south towards the Gog Magog Hills. Overlaps SHLAA site 911 in Cambridge. Adjoins sites 283.

Current use(s): Agriculture Arable Crop

**Proposed use(s):** Part of a much larger site including land in Cambridge City Council's area for an urban extension to Cambridge

Site size (ha): South Cambridgeshire: 29.05 ha

Assumed net developable area: 14.52-21.79ha (assuming 50% net or 75% net)

Assumed residential density: 40 dph in SCDC

Potential residential capacity: 581-872 Site owner/promoter: Owners known

Landowner has agreed to promote site for development?: Yes

Site origin: SHLAA call for sites

#### **Relevant planning history:**

2003. The Structure Plan panel Report considered the release of land at Netherhall Farm and concluded that "studies consistently reject this location due to its contribution to the Green Belt. We heard nothing to persuade us to form a different view. Nor did we hear anything to convince us that there were other considerations of sufficient weight to override the harm that strategic development in this location would have on Green Belt purposes."

2006. Proposals put forward through the 2006 Cambridge Local Plan: land adjoining Peterhouse Technology Park proposed for housing / employment was dismissed by the Inspector on grounds that the land was located within the Green Belt, was open land outside the urban area, was not needed to supply housing, and that land should not be released to satisfy a possible shortage of employment land on an ad-hoc basis. Netherhall Farm was found to be a sustainable location for development but dismissed because of its importance to the setting of the City and there was no need to release from the Green Belt to make up the supply of housing for Cambridge. The Inspector concluding: "Even if development were to be limited to the western part of the site, the open land of that part of the site would be lost, and this land is well seen in the foreground in views from Lime Kiln Hill and Worts Causeway. The land is seen more distantly in views from the Gog Magog Hills. In some of the relevant views the site is part of the green foreground in wider prospects over the urban area. The site is important to the setting of the City and should remain part of the Green Belt."

There are no significant planning applications.

Level 1 Part A: Strategic Considera		
Conformity with the Counci	l's Sustainable Development	t Strategy (SDS)
Criteria	Performance (fill with relevant colour R G B or RR R A G GG etc and retain only chosen score text)	Comments
Is the site within an area that has been identified as suitable for development in the SDS?	R = No G = Yes	
Flood Risk		
Criteria	Performance	Comments
Is site within a flood zone?	G = Flood risk zone 1	Green: The location lies entirely within Flood Risk Zone 1 (the lowest level of river flood risk).
Is site at risk from surface water flooding?	A = Medium risk	Amber: Small amount of surface water flooding in a band across centre of site following course of watercourse. Careful mitigation required which could impact on achievable site densities as greater level of green infrastructure required.

Green Belt		
Criteria	Performance	Comments
What effect would the development of this site have on Green Belt purposes, and other matters important to the special character of Cambridge and setting?	See below	The site is located on open, rising ground. The southern part of the site would be very visible and negatively impact the purposes of Green Belt. The northern part of the site could be mitigated if developed. See site 300.
To preserve the unique character of Cambridge as a compact and dynamic City with a thriving historic core	Distance from edge of the defined City Centre to approximate centre of site is around 5Km	Red: The visibility of the site would worsen the negative effect on perception of City as compact.
To prevent communities in the environs of Cambridge from merging into one another and with the City.	A = Some impact, but capable of mitigation	Amber: The proposed development site would extend up the easternmost slope of the Gog Magog hills. There would be effect on coalescence.
To maintain and enhance the quality of the setting of Cambridge	RR = Very high and high impacts	Red, Red: The setting of the City would be severely negatively impacted by development by compromising the openness of the area, interrupting views over the city and have a negative impact on setting.
Key views of Cambridge / Important views	R = Significant negative impact from loss or degradation of views.	Red: There are open views of the site and the City from the west and south. Existing clear views to historic and collegiate core of the City would be severely negatively impacted if development occurred on the site.
Soft green edge to the City	R = Existing high quality edge, significant negative impacts incapable of mitigation.	Red: The existing soft green edge would be negatively impacted particularly as the site is divorced from the existing urban edge.
Distinctive urban edge	G = Not present	Green: No effect on distinctive urban edge.
Green corridors penetrating into the City	G = No loss of land forming part of a green corridor / significant opportunities for enhancement through creation of a new green corridor	Green: Site is not close to recognised green corridor.
The distribution, physical	A = Negative impacts but	Amber: The proposed

separation, setting, scale and character of Green Belt villages (SCDC only)	capable of partial mitigation	development may have an affect on Fulbourn village.

Is the site located within the Cambridge Airport Public Safety Zone (PSZ) or Safeguarding Zone?	A = Site or part of site within SZ	Amber: Entire site in SZ. Small part of southern end of site in PSZ Red. No structures. 35% of site within zone any structure greater than 10m AGL.
Is there a suitable access to the site?	A = Yes, with mitigation	Amber: Yes with mitigation
Would allocation of the site have a significant impact on the local highway capacity?	A = Insufficient capacity.  Negative effects capable of appropriate mitigation.	Amber: Negative effects capable of mitigation.
		The County Highways Authority has undertaken initial transport modelling on the promoter's proposal for around 3,100 dwellings. Based on the SCATP trip rates they have assessed that it could generate around 26,410 all mode daily trips. Most of the area is over 400 metres from the nearest bus stop. Further transport modelling will need to be carried out, as part of the overall spatial strategy work, to understand the implications as a whole of further development on the transport network. New public transport services required. Roads in the area are narrow with limited capacity. Need to consider moving the bus gate on Worts Causeway, improvements to local roads to accommodate additional movements, and impact on the Hospital roundabout and Granhams Road & Babraham Road junctions. Full Transport Assessment, Travel Plan & S106 mitigation measures
Would allocation of the site	A = Insufficient capacity.	needed. Amber:
have a significant impact on the strategic road network capacity?	Negative effects capable of appropriate mitigation.  G = No capacity constraints identified that cannot be	Insufficient capacity. Negative effects capable of appropriate mitigation.
	fully mitigated	With regard to the A14 the Department for Transport

		announced in July that the A14 improvement scheme has been added to the national roads programme. Design work is underway on a scheme that will incorporate a Huntingdon Southern Bypass, capacity enhancements along the length of the route between Milton Interchange to the North of Cambridge and Huntingdon, and the construction of parallel local access roads to enable the closure of minor junctions onto the A14. The main impact, in relation to Grange Farm and other potential Local Plan sites, is that existing capacity constraints on the A14 between Cambridge and Huntingdon will be removed. The funding package and delivery programme for the scheme is still to be confirmed, and major development in the Cambridge area, which will benefit from the enhanced capacity, will undoubtedly be required to contribute towards the scheme costs, either directly or through the Community Infrastructure Levy. The earliest construction start would be 2018, with delivery by the mid-2020s being possible.
Is the site part of a larger site and could it prejudice development of any strategic sites?	A = Some impact	Amber: Site SC111 is closely related to South Cambs SHLAA Sites, SC283 and SC284. Site SC283 could be accessed off of Fulbourn Road as a free standing development. Also adjacent to City Council site CC911.
Are there any known legal issues/covenants that could constrain development of the site?	G = No	Green: No known issues
Timeframe for bringing the	G = Start of construction	Green: Start of construction

site forward for	between 2011 and 2016	between 2011 and 2016
development?	A	A 1 51
Would development of the site require significant new / upgraded utility infrastructure?	A = Yes, significant upgrades likely to be required, constraints capable of appropriate mitigation	Amber: Electricity - Not supportable from existing network. Significant reinforcement and new network required.  Mains water - The site falls within the Cambridge distribution zone of the
		Cambridge Water Company (CWC), within which there is a minimum spare capacity of 3,000 properties based on the peak day for the distribution zone, less any commitments already made to developers. There is insufficient spare capacity within the Cambridge distribution zone to supply the total number of proposed properties which could arise if all the SHLAA sites within the zone were to be developed. CWC will allocate spare capacity on a first come first served basis. Development requiring an increase in capacity of the zone will require either an upgrade to existing boosters and/or a new storage reservoir, tower or booster plus associated mains.
		Gas – Cambridge is connected to the national gas grid. A development of this scale would require substantial network reinforcement.
		Mains sewerage - There is sufficient capacity at the Cambridge works to accommodate this development site. The sewerage network is approaching capacity and a pre-development assessment will be required to ascertain the specific

		capacity of the system with regards to this site. If any mitigation is deemed necessary this will be funded by the developer.
Would development of the site be likely to require new education provision?	A = School capacity not sufficient, constraints can be appropriately mitigated	Amber: County Education comments awaited. Expect appropriate education provision to be made. For large sites on site provision would be expected.

Level 2		
Accessibility to existing ce	entres and services	
Criteria	Performance	Comments
How far is the site from the nearest District or Local centre?	R = >800m	Red: Site is further than 800m from nearest Local Centre.
How far is the nearest health centre or GP service in Cambridge?	R = >800m	Red: Site is over 800m from nearest health centre or GP service
Would development lead to a loss of community facilities?	G = Development would not lead to the loss of any community facilities or appropriate mitigation possible	Green: Development would not lead to the loss of any community facilities or appropriate mitigation possible
How well would the development on the site integrate with existing communities?	R = Limited scope for integration with existing communities / isolated and/or separated by non-residential land uses	Red: Site is isolated from existing communities with limited opportunities to facilitate community integration.
How far is the nearest secondary school?	A = 1-3km	Amber: Site is between 1 and 3km of Coleridge Community College, St Bede's Inter-Church Comprehensive School and Netherhall School
How far is the nearest primary school?	City preference:  R = >800m  SCDC:	Red: Only the northern edge of the site is within 800m of Colville Primary School).
	A = 1-3 km	SCDC Only the northern part of the site is within 1km of Colville Primary School). [Whole site is within 3km of a primary school. These include

Would development protect the shopping hierarchy, supporting the vitality and viability of Cambridge, Town, District and Local Centres?	G = No effect or would support the vitality and viability of existing centres	Colville Primary School, Fulbourn Primary School, Queen Emma Primary School, St Philip's Primary School, Teversham Primary School, Spinney Primary School, Morley Memorial Primary School, Queen Edith Community Primary School and Ridgefield Primary School] Green: The site is probably too small to support a new Local Centre by itself. The nearest Local Centre is Cherry Hinton High Street. This centre is fairly large and performing well. Additional population at this site may help to support this centre, although it is further
		than 800m away.
Accessibility to outdoor fac		
Criteria	Performance	Comments
Would development result in the loss of land protected by Cambridge Local Plan policy 4/2 or South Cambridgeshire Development Control policy SF/9? (excluding land which is protected only because of its Green Belt status).	G=No	Green: Site is not protected open space or has the potential to be protected
If the site is protected open space can the open space be replaced according to CLP Local Plan policy 4/2 Protection of Open Space or South Cambridgeshire Development Control policy SF/9 (for land in South Cambridgeshire)?	R=No G=Yes	N/A

Air Quality, pollution, conta	mination and noise	
Criteria	Performance	Comments
Is the site within or near to an AQMA, the M11 or the A14?	G = >1000m of an AQMA, M11, or A14	Major Development Environmental Impact Assessment required to assess likely major transport impact. Outside the Air Quality Management Area but air quality assessment required. More than 1000m from an AQMA, M11 or A14.
Would the development of the site result in an adverse impact/worsening of air quality?	A = Adverse impact	Amber:
Are there potential noise and vibration problems if the site is developed, as a receptor or generator?	A = Adverse impacts capable of adequate mitigation	Amber: The North of the site is close to Cambridge Road. Traffic noise will need assessment in accordance with PPG 24 and associated guidance. The impact of existing noise on any future residential in this area is a material consideration in terms of health and well being and providing a high quality living environment. However residential use is likely to be acceptable with careful noise mitigation
Are there potential light pollution problems if the site is developed, as a receptor or generator?	G = No adverse effects or capable of full mitigation	Green:
Are there potential odour problems if the site is developed, as a receptor or generator?	G = No adverse effects or capable of full mitigation	Green: No adverse effects for residential use

Is there possible contamination on the site?	A = Site partially within or adjacent to an area with a history of contamination, or capable of remediation appropriate to proposed development	Amber: Part of this site is adjacent to an area of unknown filled land. This could be dealt with by condition.
Protecting Groundwater		
Criteria	Performance	Comments
Would development be within a source protection zone? Groundwater sources (e.g. wells, boreholes and springs) are used for public drinking water supply. These zones show the risk of contamination from any activities that might cause pollution in the area.	G = Not within SPZ1 or allocation is for greenspace	Green: Not within SPZ1 or allocation is for greenspace

Protecting the townscape and historic environment (Landscape addressed by Green Belt criteria)		
Criteria	Performance	Comments
Would allocation impact upon a historic park/garden?	G = Site does not contain or adjoin such areas, and there is no impact to the setting of such areas	Green: Site does not contain or adjoin such areas, and there is no impact to the setting of such areas
Would development impact upon a Conservation Area?	A = Site contains, is adjacent to, or within the setting of such an area with potential for negative impacts capable of appropriate mitigation	Amber: Abuts Fulbourn Hospital CA. Adverse effect to setting of Conservation Area due to loss of significant open land providing rural backdrop for the designed landscape of Fulbourn Hospital.
Would development impact upon buildings of local interest (Cambridge only)	G = Site does not contain or adjoin such buildings, and there is no impact to the setting of such buildings	Green:
Would development impact upon archaeology?	A = Known archaeology on site or in vicinity	Amber: Numerous Bronze Age ring barrows area known in the vicinity. The War Ditches Iron Age defensive site is located to the east and the line of the Via Devana Roman road forms the southern site boundary. Further information would be necessary in advance of any planning application for

	this site.
	Results of <b>pre- determination</b> evaluation to be submitted with any planning application to inform a planning decision.

Making Efficient Use of Land		
Criteria	Performance	Comments
Would development lead to the loss of the best and most versatile agricultural land?	R = Significant loss (20 ha or more) of grades 1 and 2 land	Red: Whole of site is Grade 2 land. (24.75ha)
Would development make use of previously developed land (PDL)? (CITY)	R = No	Red: 0% PDL
Would development make use of previously developed land (PDL)? (SCDC)	A=No	Amber :No
Biodiversity and Green Infra		
Criteria	Performance	Comments
Would development impact upon a locally designated wildlife site i.e. (Local Nature Reserve, County Wildlife Site, City Wildlife Site)	A = Contains or is adjacent to an existing site and impacts capable of appropriate mitigation	Amber: County Wildlife Site - Roadside verges of Limekiln Road & Worts Causeway are a County Wildlife Site as is Netherhall Farm. Local Nature Reserve – Adjoins Beechwoods LNR to south.
Does the site offer opportunity for green infrastructure delivery?	G = Development could deliver significant new green infrastructure	Green: The whole site is of strategic importance for Countywide Green Infrastructure and is proposed for landscape scale chalk grassland Restoration and creation in the adopted 2011 Cambridgeshire Green Infrastructure strategy. The vision is to link up the existing isolated sites with Wandlebury, Gog Magogs, Nine Wells Local Nature Reserve and the natural green space of the Clay Farm development.
Would development reduce habitat fragmentation, enhance native species,	A = Development would have a negative impact on existing features or network	Amber: Presence of protected species - Greatest impact likely to be

and help deliver habitat restoration (helping to achieve Biodiversity Action Plan targets?)	links but capable of appropriate mitigation	from the extensive loss of open farmland leading to impact upon farmland species including brown hare and farmland birds. Protected road verges exist south of the site which may be impacted upon if road improvement schemes are needed. Opportunity for habitat linkage/ enhancement/restoration – includes new woodland planting, new and reinforced hedgerows, buffering of and extensions to grassland habitats and the creation of new ponds.
Are there trees on site or immediately adjacent protected by a Tree Preservation Order (TPO)?	G = Site does not contain or adjoin any protected trees	Green: None in South Cambridgeshire
Any other information not of	aptured above?	
Conclusions		
Cross site comparison	B 0: '''	D 1
Level 1 Conclusion (after allowing scope for mitigation)	R = Significant constraints or adverse impacts	Red: - Very significant impact on Green Belt purposes
Level 2 Conclusion (after allowing scope for mitigation)  Overall Conclusion	R = Significant constraints or adverse impacts	Red: -Site is not near to local facilities such as district / local centre, GP surgery and primary school, and due to its size it is less likely to be able to provide for new facilitiesCycle access is poorLoss of Grade 2 agricultural land (24.75 ha).
Overali Conclusion	R = Site with no significant development potential (significant constraints and adverse impacts)	Red: Site with no significant development potential (significant constraints and adverse impacts)
Viability feedback (from consultants)	R = Unlikely to be viable, A = May be viable G = Likely to be viable	Sites ranked A or G will be taken forward for viability assessment by consultants

## **Cambridge City Council / South Cambridgeshire District Council**

Green Belt Site and Sustainability Appraisal Assessment Proforma

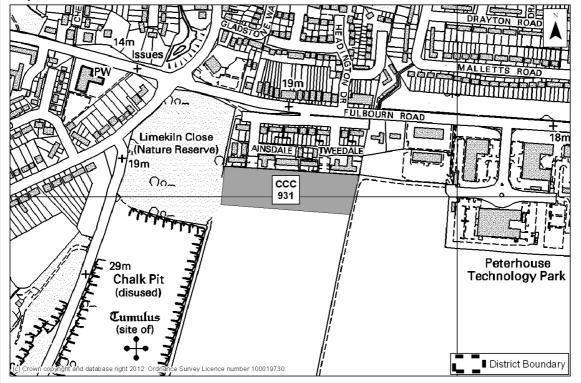

Site Information Broad Location 7- Land Between Babraham Road and Fulbourn Road

Site reference number(s): CC931

Site name/address: Fulbourn Road South 1

Functional area (taken from SA Scoping Report): South Cambridge

Site description: Arable open field south of Fulbourn Road

Current use(s): Agriculture

Proposed use(s): Employment

Site size (ha): Cambridge: 1.3 ha SCC 0.00ha

**Assumed net developable area:** 0.98ha (assuming 75% net)

Assumed residential density: 45dph

Potential residential capacity: 44 but this option being promoted for employment

Site owner/promoter: Owner known

Landowner has agreed to promote site for development?: Yes but only in context of

larger site

Site origin: Green Belt Site Assessment 2012

## Relevant planning history:

Omission Site No.7 - Land Adjoining Peterhouse Technology Park (small site on northern edge of Site CC911) - The land was dismissed by the Inspector partly on lack of evidence on some issues, but more substantially on grounds that the site is open land, in the Green Belt (the boundary here is clear and firm), and outside the urban area. There was also no need for the site.

No relevant planning applications for residential use.

Conformity with the Council's Sustainable Development Strategy (SDS)		
Criteria	Performance (fill with relevant colour R G B or RR R A G GG etc and retain only chosen score text)	Comments
Is the site within an area that has been identified as suitable for development in the SDS?	R = No G = Yes	
Flood Risk	,	
Criteria	Performance	Comments
Is site within a flood zone?	G = Flood risk zone 1	Green: Site in Flood risk zone 1
Is site at risk from surface water flooding?	G = Low risk	Green: No surface water issues. Development should be mindful of potential flow routes from adjacent high land.
Green Belt		
Criteria	Performance	Comments
What effect would the development of this site have on Green Belt purposes, and other matters important to the special character of Cambridge and setting?	See below	The site is discretely located behind existing housing and is at the bottom of north facing slope and would have a minor negative effect on the purposes of Green Belt.
To preserve the unique character of Cambridge as a compact and dynamic City with a thriving historic core	Distance from edge of the defined City Centre in Kilometres to approximate centre of site under 5km	Red: Development would extend the urban edge eastward and would have a impact on compactness.
To prevent communities in the environs of Cambridge from merging into one another and with the City.	G = No impact	Green: Sensitive, limited and low level development could be considered with no impact on separation.
To maintain and enhance the quality of the setting of Cambridge	A = Medium and medium/minor impacts	Amber: The site is on the existing urban edge and discretely located. Sensitively designed development at the same contour including a landscape buffer would

		have limited impact on
		setting.
Key views of Cambridge /	A = Negative impact from	Amber: There are
Important views	loss or degradation of	expansive views from
	views.	higher ground to the south
		looking over the site and to
		the City and Fulbourn.
		Views could be mitigated if
		development was set at a
		similar contoured as the
		existing housing and

Would allocation of the site	A = Insufficient capacity.	Amber:
have a significant impact on the local highway capacity?	Negative effects capable of appropriate mitigation.	Insufficient capacity.  Negative effects capable of
ine local highway capacity!	appropriate mitigation.	appropriate mitigation.
		appropriate magadon.
		This site is of a scale that
		would trigger the need for a
		Transportation Assessment
		(TA) and Travel Plan (TP),
		regardless of the need for a
		full Environmental Impact
		Assessment.

S106 contributions and mitigation measures will be required where appropriate. Any Cambridge Area Transport Strategy or other plans will also need to be taken into account. Would allocation of the site A = Insufficient capacity. Amber: have a significant impact on Negative effects capable of the strategic road network appropriate mitigation. With regard to the A14 the capacity? Department for Transport announced in July that the A14 improvement scheme has been added to the national roads programme. Design work is underway on a scheme that will incorporate a Huntingdon Southern Bypass, capacity enhancements along the length of the route between Milton Interchange to the North of Cambridge and Huntingdon, and the construction of parallel local access roads to enable the closure of minor junctions onto the A14. The main impact, in relation to Grange Farm and other potential Local Plan sites, is that existing capacity constraints on the A14 between Cambridge and Huntingdon will be removed. The funding package and delivery programme for the scheme is still to be confirmed, and major development in the Cambridge area, which will benefit from the enhanced capacity, will undoubtedly be required to contribute towards the scheme costs, either directly or through the Community Infrastructure Levy. The earliest construction start would be 2018, with delivery by the mid-2020s being possible.

Is the site part of a larger site and could it prejudice development of any strategic sites?	A = Some impact	Amber: Yes, this site could be part of a larger site. Along with the neighbouring Site CC932 it forms a small part of Site CC911 which is closely related to South Cambs SHLAA Sites SC111 and SC283 to the east.
Are there any known legal issues/covenants that could	G = No	The inclusion of additional land might also maximise development opportunities and provide a better opportunity for the formation of a sustainable community. However, it is not likely that the development of this site alone would unduly prejudice other sites because of various existing access roads in the area.  Green: No Site owners will need to
constrain development of the site?		confirm this consideration.
Timeframe for bringing the site forward for development?	A = Start of construction between 2017 and 2031	Amber: SHLAA Call for Sites 2011 – Bidwells submission on behalf of developer/ landowner - The first dwellings to be completed on site 2011-16. This comment relates to the whole of SC911. Confirmation is required regarding this part of the site and whether it will form part of a much larger site. Not clear which part will be brought forward first in 2011-16 therefore Amber score to reflect possible delay to delivery.
Would development of the site require significant new / upgraded utility infrastructure?	A = Yes, significant upgrades likely to be required, constraints capable of appropriate mitigation	Amber: Improvements to utilities required. The developer will need to liaise with the relevant service provider/s to determine the appropriate utility infrastructure provision.
Would development of the site be likely to require new education provision?	A = School capacity not sufficient, constraints can be appropriately mitigated	Amber: County Education comments awaited. Expect appropriate education

	provision to be made. For smaller sites this is likely to be off site.

Level 2		
Accessibility to existing centres and services		
Criteria	Performance	Comments
How far is the site from the nearest District or Local centre?	G = <400m	Green: Site is within 400m (as the crow flies) of Cherry Hinton High Street local centre.
How far is the nearest health centre or GP service in Cambridge?	A = 400-800m	Amber: Site is between 400 and 800m from nearest health centre or GP service.
Would development lead to a loss of community facilities?	G = Development would not lead to the loss of any community facilities or appropriate mitigation possible	Green: No
ADD CRITERIA		
How far is the nearest secondary school?	G = <1km or non-housing allocation or site large enough to provide new school	Green: Site is within 1km from nearest secondary school.
How far is the nearest primary school?	City preference:  A = 400-800m  SCDC: G = <1km or non housing allocation	Amber: Whole site is within 800m from nearest primary school (Colville & Queen Emma). Half the site is within 800m from Queen Emma Primary School
Would development protect the shopping hierarchy, supporting the vitality and viability of Cambridge, Town, District and Local Centres?	G = No effect or would support the vitality and viability of existing centres	Green: The site is too small to support a new Local Centre. The nearest Local Centre is Cherry Hinton High Street. This centre is fairly large and performing well. Additional population at this site may help to support this centre.
Accessibility to outdoor facilities and green spaces		
Criteria	Performance	Comments
Would development result in the loss of land protected by Cambridge Local Plan policy	G=No	Green: Site is not protected open space or have the potential to be protected

4/2 or South Cambridgeshire Development Control policy SF/9? (excluding land which is protected only because of its Green Belt status).  If the site is protected open space can the open space be replaced according to CLP Local Plan policy 4/2 Protection of Open Space or South Cambridgeshire Development Control policy SF/9 (for land in South Cambridgeshire)?	R=No G=Yes	Not applicable
If the site does not involve any protected open space would development of the site be able to increase the quantity and quality of publically accessible open space /outdoor sports facilities and achieve the minimum standards of onsite public open space provision?	G = Assumes minimum on- site provision to adopted plan standards is provided onsite	Green: No obvious constraints that prevent the site providing minimum onsite provision.
Supporting Economic Growth		
Criteria	Performance	Comments
How far is the nearest main employment centre?	G = <1km or allocation is for or includes a significant element of employment or is for another non- residential use	Green: The site is within 1km of an employment centre.
Would development result in the loss of employment land identified in the Employment Land Review?	G = No loss of employment land / allocation is for employment development	Green: Development would not lead to the loss of employment land identified in the Employment Land Review.
Would allocation result in development in deprived areas of Cambridge?	G = Within or adjacent to the 40% most deprived Local Super Output Areas (LSOA) within Cambridge according to the Index of Multiple Deprivation 2010.	Green: Site in Cherry Hinton LSOA 7960: 20.41 (within 40% most deprived LSOA)
Sustainable Transport		
Criteria	Performance	Comments
What type of public transport service is accessible at the edge of the site?	G = High quality public transport service	Green: Site is within 100m from a bus route. Service does meet the requirements of a high quality public transport (HQPT).
How far is the site from an existing or proposed train station?	R = >800m	Red: Site is greater than 800m from either an existing or proposed train station.
What type of cycle routes	R = No cycling provision or	Red: This side of Fulbourn

are accessible near to the site?	a cycle lane less than 1.5m width with medium volume of traffic. Having to cross a busy junction with high cycle accident rate to access local facilities/school. Poor quality off road path.	Road has no cycling provision and speeds can be high and cyclists will need to cross the busy junction to join the on-road cycle lane or off-road path along Cherry Hinton Rd.
SCDC Would development reduce the need to travel and promote sustainable transport choices:	GG = Score 19-24 from 4 criteria below	Total Score = 21
SCDC Sub-indicator: Distance to a bus stop / rail station	Within 400m (6)	Fulbourn Road

#### Green Belt Site and Sustainability Appraisal Assessment Proforma

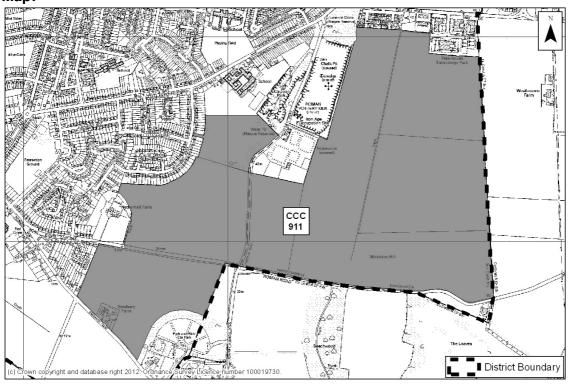

# Site Information Broad Location No. 7 Land between Babraham Road and Fulbourn Road

Site reference number(s): CC911

**Site name/address:** Cambridge South East-Land south Fulbourn Road r/o Peterhouse Technology Park extending south & west of Beechwood on Worts Causeway, land west of Babraham P&R

# Functional area (taken from SA Scoping Report): South Cambridge

#### Map:

**Site description:** Arable open fields and chalk grassland between Fulbourn Road and Beechwoods at western most slope of the Gog Magog Hills and including Netherhall and Newbury farms to west, and part of Netherhall School playing fields. The land slopes away on both sides from a ridge of higher land running southeast to northwest through the middle of the location.

**Current use(s):** Agricultural land, woodland and School playing fields and adjoining park & ride car park

Proposed use(s): Residential

Site size (ha): 116.55 South Cambridgeshire:0.00ha but sites SC111, SC283, SC284 adjoin.

Cambridge: 116.55 ha

Assumed net developable area: 58.28-87.41ha (assuming 50% net or 75% net)

Assumed residential density: 45dph
Potential residential capacity: 2622-3934
Site owner/promoter: Owner known

Landowner has agreed to promote site for development?: Yes

Site origin: SHLAA call for sites

#### Relevant planning history:

Cambridge Local Plan Inspectors Report

2006: Omission Site No.5 - Netherall Farm (south-west corner of Site CC911) - The Inspector rejected the inclusion of the site because:

- it is a large area of open land within Green Belt, outside built up area which was not needed for housing supply.
- He also raised the importance of several views and setting of the City, and lack of screening.
- It was also said to not have the advantages of the Southern Fringe, and not related to Addenbrookes to justify it.

The Inspector did however say the site is a sustainable location with respect to access to services and employment and no objections on infrastructure grounds or difficulties with building communities.

Omission Site No.7 - Land Adjoining Peterhouse Technology Park (small site on northern edge of Site CC911) - The land was dismissed by the Inspector partly on lack of evidence on some issues, but more substantially on grounds that the site is open land, in the Green Belt (the boundary here is clear and firm), and outside the urban area. There was also no need for the site.

No relevant planning applications for residential use.

Conformity with the Council's Sustainable Development Strategy (SDS)		
Criteria	Performance (fill with relevant colour R G B or RR R A G GG etc and retain only chosen score text)	Comments
Is the site within an area that has been identified as suitable for development in the SDS?	R = No G = Yes	
Flood Risk		
Criteria	Performance	Comments
Is site within a flood zone?	G = Flood risk zone 1	Green: The location lies entirely within Flood Risk Zone 1 (the lowest level of river flood risk).
Is site at risk from surface water flooding?	A = Medium risk	Amber: Significant site regarding surface water flooding as runoff contributes to surface water flooding of the existing built environment. Could potential offer a solution and flood risk management benefit, but may impact on achievable densities as great level of green infrastructure required.
Green Belt		
Criteria	Performance	Comments
What effect would the development of this site	See below	Development on this site would have severe negative

have on Green Belt purposes, and other matters important to the special character of Cambridge and setting?		impact on the Green Belt. The exception might be the small parcels of land to the east of Netherhall Farm and east of Alwyne Road and south of Fulbourn Road. See sites 932, 933, 300, 929 and 930.
To preserve the unique character of Cambridge as a compact and dynamic City with a thriving historic core	Distance from edge of the defined City Centre in Kilometres approximate centre of site is 5km	Red: Any major development in the south east of the City would increase distance from edge to centre.
To prevent communities in the environs of Cambridge from merging into one another and with the City.	A = Some impact, but capable of mitigation	Amber: The proposed development site would extend up the easternmost slope of the Gog Magog hills. There would be effect on coalescence.
To maintain and enhance the quality of the setting of Cambridge	RR = Very high and high impacts	Red, Red: The setting of the City would be severely negatively impacted by development by compromising the openness of the area, interrupting views over the city and have a negative impact on setting.
Key views of Cambridge / Important views	R = Significant negative impact from loss or degradation of views.	Red: There are open views of the site and the City from the west and south.  Existing clear views to historic and collegiate core of the City would be severely negatively impacted if development occurred on the site.
Soft green edge to the City	R = Existing high quality edge, significant negative impacts incapable of mitigation.	Red: The existing high quality soft green edge would be negatively impacted.
Distinctive urban edge	G = Not present	Green: No effect on distinctive urban edge.
Green corridors penetrating into the City	G = No loss of land forming part of a green corridor / significant opportunities for enhancement through creation of a new green corridor	Green: There would be no loss of land associated with a recognised green corridor. However the site does abut East Pit Nature Reserve.
The distribution, physical separation, setting, scale and character of Green Belt villages (SCDC only)	A = Negative impacts but capable of partial mitigation	Amber: The proposed development may have an affect on Fulbourn village.

A landscape which has a strongly rural character	R = Significant negative impacts incapable of	Red: The landscape is strongly rural despite being
	satisfactory mitigation	on the urban edge. Development would have a severe negative impact.
Overall conclusion on Green Belt	RR = Very high and high impacts	Red, Red: Development of this site, except the small parcel to the east of Netherhall Farm, east of Alwyne Road and south of Fulbourn Road would have a severe negative impact on the purposes of Green Belt.
Impact on national Nature (		
Criteria	Performance	Comments
Would allocation impact upon a Site of Special Scientific Interest (SSSI)?	A = Site is on or adjacent to an SSSI with negative impacts capable of mitigation	Amber: There is a large nature area immediately adjacent to the north-west boundary on Limekiln Hill which includes the East Pit and Limekiln Hill Sites of Special Scientific Interest (SSSI's).
		A large SSSI exists south of Worts Causeway within SCDC focusing on the Gog Magogs golf course.
Impact on National Heritage		
Criteria	Performance Constitution and an arrangement	Comments
Will allocation impact upon a Scheduled Ancient Monument (SAM)?	G = Site is not on or adjacent to a SAM	Green: Site is not on or adjacent to a SAM
Would development impact upon Listed Buildings?	G = Site does not contain or adjoin such buildings, and there is no impact to the setting of such buildings	Green: Site does not contain or adjoin such buildings, and there is no impact to the setting of such buildings
Part B: Deliverability and V	iability Criteria	
Criteria	Performance	Comments
Is the site allocated or safeguarded in the Minerals and Waste LDF?	G = Site is not within an allocated or safeguarded area.	Green: This site does not fall within a Minerals Safeguarding Area; a WWTW or Transport Zone Safeguarding Area; or a Minerals or Waste Consultation Area.
		The adopted Core Strategy, Policy CS16, identifies Cambridge south as a Broad Location for a new Household Recycling Centre (HRC). Part of this

		area falls within this broad location. Policy CS16 requires major developments to contribute to the provision of HRCs, consistent with the adopted RECAP Waste Management Guide. Contributions may be required in the form of land and / or capital payments. This outstanding infrastructure deficit for an HRC must be addressed, such infrastructure is a strategic priority in the NPPF.
Is the site located within the Cambridge Airport Public Safety Zone (PSZ) or Safeguarding Zone?	R = Site is within the PSZ	Red: Site is within the PSZ; 50% - No development 10% - Any Structure greater than 10m AGL 40% - Any Structure greater than 15m AGL
Is there a suitable access to the site?	A = Yes, with mitigation	Amber: with mitigation
Would allocation of the site have a significant impact on the local highway capacity?	A = Insufficient capacity. Negative effects capable of appropriate mitigation.	Amber: This site could accommodate around 3,100 dwellings (2,360 in City and 740 in South Cambs). Based on the trip rates in the Southern Corridor Area Transport Plan this could generate around 26,410 all mode daily trips.
		A full Transport Assessment would be required for any development on this site and would need to model the impact on junction capacities on the local network. A Residential Travel plan would be also be required along with measures to link walking and cycling into the existing links. Any development would need to consider the existing bus gate on Worts Causeway.
		The development surrounds Cherry Hinton road/Limekiln Hill Road and these existing adopted public highways

		may require improvement/ alterations to accommodate the additional traffic movements. The hospital roundabout is an accident cluster site, which will need to be considered along with the impact on Granhams Road/Babraham Road junction.  S106 contributions and mitigation measures will be required where appropriate. Any Cambridge Area Transport Strategy or other plans will also need to be taken into account.  This site is of a scale that would trigger the need for a Transportation Assessment (TA) and Travel Plan (TP), regardless of the need for a full Environmental Impact Assessment.
Would allocation of the site have a significant impact on the strategic road network capacity?	A = Insufficient capacity. Negative effects capable of appropriate mitigation.	Amber: As it stands the A14 corridor cannot accommodate any significant additional levels of new development traffic. There are proposed minor improvements to the A14 in the short term (within 2 years) which are expected to release a limited amount of capacity, however the nature and scale of these are yet to be determined.  The Department for Transport are also carrying out a study looking at improving things longer term, in the wake of the withdrawn Ellington to Fen Ditton Scheme.  This site has the potential advantage of dispersed tripmaking patterns in relation to the Strategic Road

of its trip-making. Given the above it is likely that a substantial proportion could be delivered without any adverse impact upon the SRN. A robust assessment would be required to determine what this proportion might realistically be

With regard to the A14 the Department for Transport announced in July that the A14 improvement scheme has been added to the national roads programme. Design work is underway on a scheme that will incorporate a Huntingdon Southern Bypass, capacity enhancements along the length of the route between Milton Interchange to the North of Cambridge and Huntingdon, and the construction of parallel local access roads to enable the closure of minor junctions onto the A14. The main impact, in relation to Grange Farm and other potential Local Plan sites, is that existing capacity constraints on the A14 between Cambridge and Huntingdon will be removed. The funding package and delivery programme for the scheme is still to be confirmed, and major development in the Cambridge area, which will benefit from the enhanced capacity, will undoubtedly be required to contribute towards the scheme costs, either directly or through the Community Infrastructure Levy. The earliest construction start would be 2018, with delivery by the mid-2020s being possible.

Is the site part of a larger

A = Some impact

Amber: Yes, Site CC911 is

site and could it prejudice development of any strategic sites?		closely related to South Cambs SHLAA Sites SC111, SC283 and SC284. Site SC283 could be accessed off of Fulbourn Road as a free standing development.
Are there any known legal issues/covenants that could constrain development of the site?	G = No	Green: Not aware of any legal issues/covenants
Timeframe for bringing the site forward for development?	G = Start of construction between 2011 and 2016	Green: SHLAA Call for Sites 2011 – Bidwells submission on behalf of developer/ landowner - The first dwellings to be completed on site 2011-16.
Would development of the site require significant new / upgraded utility infrastructure?	A = Yes, significant upgrades likely to be required, constraints capable of appropriate mitigation	Amber: Improvements to utilities required. The developer will need to liaise with the relevant service provider/s to determine the appropriate utility infrastructure provision.
Would development of the site be likely to require new education provision?	A = School capacity not sufficient, constraints can be appropriately mitigated	Amber: County Education comments awaited. Expect appropriate education provision to be made. For large sites on site provision would be expected.

Level 2		
Accessibility to existing centres and services		
Criteria	Performance	Comments
How far is the site from the nearest District or Local centre?	A = 400-800m	Amber: Approximately 5% of the site is within 400m and 10% within 400-800m (as the crow flies) of Cherry Hinton High Street local centre. An additional 10% is within 400-800m of Wulfstan Way local centre. However, approximately 75% of the site is beyond 800m of a local centre. The site has been scored amber as it is large enough to support a new local centre.
How far is the nearest health centre or GP service in Cambridge?	R = >800m	Red: Part of site within 800 m limit with majority of site beyond 800m from nearest health centre or GP service
Would development lead to	G = Development would not	Green: Development would

a loss of community	lead to the loss of any	not lead to the loss of any
facilities?	community facilities or	community facilities
	appropriate mitigation	
	possible	
How well would the	G = Good scope for	Green: Site should provide
development on the site	integration with existing	good opportunities by virtue
integrate with existing	communities / of sufficient	of its size to link with
communities?	scale to create a new	existing communities, with
	community	good urban design, good
		connectivity and appropriate
		community provision to aid
		integration.
How far is the nearest	A = 1-3km	Amber: Site part within 1km
secondary school?		limit and part between 1
		and 3 km limit from nearest
		secondary school.
How far is the nearest	City preference:	Green: Site part between
primary school?		400m and 800m limit and
	A = 400-800m	part beyond 800m limit from
		nearest primary school. Site
	SCDC:	is however large enough to
		provide its own facilities.
	G = <1 km or non housing	
	allocation or site large	
	enough to provide new	
	school	
Would development protect	G = No effect or would	Green: The site would be
the shopping hierarchy,	support the vitality and	large enough to support a
supporting the vitality and	viability of existing centres	new Local Centre. The
viability of Cambridge,		nearest Local Centres at
Town, District and Local		Wulfstan Way and Cherry
Centres?		Hinton High Street are
		further than 800m from the
		site. The distance to these
		centres and the potential
		size of the new population if
		the site was brought
		forward would merit a new
		Local Centre, which would
		be unlikely to have an
		impact on the existing
		hierarchy.
Accessibility to outdoor fac

ita Cuana Dalt status)	and the second s	
its Green Belt status).  If the site is protected open	R=No	Red: Any future

space can the open space be replaced according to CLP Local Plan policy 4/2 Protection of Open Space or South Cambridgeshire Development Control policy SF/9 (for land in South Cambridgeshire)?  If the site does not involve any protected open space would development of the site be able to increase the quantity and quality of publically accessible open space /outdoor sports facilities and achieve the	G = Assumes minimum on- site provision to adopted plan standards is provided onsite	development would need to satisfactorily incorporate the environmentally sensitive protected open space or demonstrate it can be reprovided elsewhere in an appropriate manner.  Green: Assuming area of Protected Open Space is removed from the site, no obvious constraints that prevent the remainder of site providing full on-site provision.
minimum standards of onsite public open space provision?		
Supporting Economic Grov	vth	
Criteria	Performance	Comments
How far is the nearest main employment centre?	G = <1km or allocation is for or includes a significant element of employment or is for another non- residential use	Green: Site is within 1km of an employment centre
Would development result in the loss of employment land identified in the Employment Land Review?	G = No loss of employment land / allocation is for employment development	Green: Development would not lead to the loss of employment land identified in the Employment Land Review
Would allocation result in development in deprived areas of Cambridge?	G = Within or adjacent to the 40% most deprived Local Super Output Areas (LSOA) within Cambridge according to the Index of Multiple Deprivation 2010.	Green: Site in Cherry Hinton LSOA 7960: 20.41 (within 40% most deprived LSOA) and Queen Edith's LSOA 7995: 3.99
Sustainable Transport		
Criteria	Performance	Comments
What type of public transport service is accessible at the edge of the site?	R = Service does not meet the requirements of a high quality public transport (HQPT)	Red: At present, and despite being close to the Babraham Road Park & Ride, only a small section of the northern part of the site off Fulbourn Road is less than 400m from the HQPT services provided by the Citi 1 and Citi 3 services. The entirety of the site does not meet the Local Plan (Policy 8/7) definition of high quality public transport. This is because a significant part of the Site is more than 400

		matros from any of those
		metres from any of these bus routes.
How far is the site from an existing or proposed train station?	R = >800m	Red: More than 800m.
What type of cycle routes are accessible near to the site?	R = No cycling provision or a cycle lane less than 1.5m width with medium volume of traffic. Having to cross a busy junction with high cycle accident rate to access local facilities/school. Poor quality off road path.	Red: Depending on the location within the large site— e.g. the middle section could be Amber if there is a cycle/pedestrian connection to Beaumont Rd and a crossing of Limekiln Road thus linking to the off-road paths on Queen Edith's Rd which could be widened.
SCDC Would development reduce the need to travel and promote sustainable transport choices:	G = Score 15-19 from 4 criteria below	Total Score = 18
SCDC Sub-indicator: Distance to a bus stop / rail station	Within 1000m (2)	Cambridge, Netherhall School
SCDC Sub-indicator: Frequency of Public Transport	10 minute service or better (6)	Citi 1 service.
SCDC Sub-Indicator: Typical public transport journey time to Cambridge City Centre	Between 21 and 30 minutes (4)	24 minutes – (Cambridge, Netherhall School – Cambridge, St. Andrews Street)
SCDC Sub-indicator: Distance for cycling to City Centre	Up to 5km (6)	4.04km ACF
Air Quality, pollution, conta	mination and noise	
Criteria	Performance	Comments
Is the site within or near to an AQMA, the M11 or the A14?	G = >1000m of an AQMA, M11, or A14	Green: Major Development Environmental Impact Assessment required to assess likely major transport impact. Outside the Air Quality Management Area but air quality assessment required. More than 1000m from an AQMA, M11 or A14.
Would the development of the site result in an adverse impact/worsening of air quality?	R = Significant adverse impact	Red: The development will have a significant adverse impact on air quality and the AQMA due to major transport impact. An air quality assessment is essential.
Are there potential noise and vibration problems if the site is developed, as a	A = Adverse impacts capable of adequate mitigation	Amber: Site has a busy road running through the middle of the site and is

receptor or generator?		bounded by major roads. Frontages will be the noisiest part of the site from
		the road. Noise assessment and potential noise mitigation required.
Are there potential light pollution problems if the site is developed, as a receptor or generator?	G = No adverse effects or capable of full mitigation	Green: From purely the residential amenity point of view the light impact from development would require assessment in the ES but could be fully mitigated.
		Other agencies should be consulted regarding the impact on wild life, night sky and the County Council regarding impact on public highways.
Are there potential odour problems if the site is developed, as a receptor or generator?	G = No adverse effects or capable of full mitigation	Green: No adverse effects
Is there possible contamination on the site?	A = Site partially within or adjacent to an area with a history of contamination, or capable of remediation appropriate to proposed development	Amber: The site has former potentially contaminative activities. Further contamination assessment is required.
<b>Protecting Groundwater</b>		
Criteria	Performance	Comments
Would development be within a source protection zone? Groundwater sources (e.g. wells, boreholes and springs) are used for public drinking water supply.	G = Not within SPZ1 or allocation is for greenspace	Green: Not within SPZ1 or allocation
These zones show the risk of contamination from any activities that might cause pollution in the area.		

Protecting the townscape and historic environment (Landscape addressed by Green		
Belt criteria)

Would development impact upon buildings of local interest (Cambridge only)	G = Site does not contain or adjoin such buildings, and there is no impact to the setting of such buildings	Green: Site does not contain or adjoin such buildings, and there is no impact to the setting of such buildings
Would development impact upon archaeology?	A = Known archaeology on site or in vicinity	Amber: National Grid Reference (centred) Significant prehistoric sites known on the chalk south of Cherry Hinton Road: former site of 'War Ditches' Iron Age hill fort was partially excavated in early 20thC ahead of clunch extraction on Lime Kiln Road (Monuments in Cambridge - MCB5999). Evidence of a massacre at the site. Cropmarks of Bronze Age round barrow groups (burial mounds), now ploughed flat , are evident in several places in this allocation area (eg MCBs 3446, 6004, 13462 and those excavated in advance of Peterhouse Technology Park ECB357 (ECB – Events Cambridge). Field scatters of prehistoric stone implements throughout. Worsted Street Roman Road (part of Via Devana - Godmanchester to Colchester Road) traverses the site and likely to have roadside settlements along its route. A programme of archaeological works should be undertaken prior to the submission of any planning application.

Making Efficient Use of Land		
Criteria	Performance	Comments
Would development lead to	A = Minor loss of grade 1	Amber: Approximately half
the loss of the best and	and 2 land	of site on Grade 3 land,
most versatile agricultural		30% on Grade 2 land (50

Are there trees on site or immediately adjacent protected by a Tree Preservation Order (TPO)?	G = Site does not contain or adjoin any protected trees	scheme could benefit these and other species. Full ecological surveys would be required in order to assess potential impacts. Appropriate development at base of slope may help realise Green Infrastructure vision.  Green: Group Tree Preservation Order (TPO) (07/2007) is just outside the site on the south-west boundary of the site. Predevelopment tree survey required.
Any other information not o	aptured above?	
Conclusions		
Cross site comparison		
Level 1 Conclusion (after allowing scope for mitigation)	R = Significant constraints or adverse impacts	Red: - Very significant impact on Green Belt purposes - Large part of site constrained by Cambridge Airport public safety zone Red:
Level 2 Conclusion (after allowing scope for mitigation)	R = Significant constraints or adverse impacts	-Further than 800m to access GP surgerySignificant air quality impactLoss of protected open space, but this could be mitigated because the site is largeThe site does not have access to high quality public transport, and has poor cycle access.
Overall Conclusion	R = Site with no significant development potential (significant constraints and adverse impacts)	Red: Site with no significant development potential (significant constraints and adverse impacts)
Viability feedback (from consultants)	R = Unlikely to be viable, A = May be viable G = Likely to be viable	Sites ranked A or G will be taken forward for viability assessment by consultants

## **Cambridge City Council / South Cambridgeshire District Council**

## Green Belt Site and Sustainability Appraisal Assessment Proforma

Site Information

Broad Location 7, Land between Babraham Road and Fulbourn Road

Site reference number(s): SC284

Site name/address: Land south of Worts Causeway, Cambridge

Functional area (taken from SA Scoping Report): South Cambridge

**Site description:** Arable fields, some with hedges and trees, south of Fulbourn Road including land on both sides of Limekiln Road. Adjoins Babraham Road Park & Ride site. The site rises to the north and east. Adjoins SHLAA site CC911 in Cambridge.

■ District Boundary

Current use(s): Agriculture Arable Crop

**Proposed use(s):** Residential. Part of a much larger site including land in Cambridge City Council's area for an urban extension to Cambridge

Site size (ha): South Cambridgeshire: 24.92 ha

Assumed net developable area:
Assumed residential density: 28.5dph
Potential residential capacity: 712
Site owner/promoter: Owners known

Landowner has agreed to promote site for development?: Yes

Site origin: SHLAA call for sites

#### Relevant planning history:

2003. The Structure Plan panel Report considered the release of land at Netherhall Farm and concluded that "studies consistently reject this location due to its contribution to the Green Belt. We heard nothing to persuade us to form a different view. Nor did we hear anything to convince us that there were other considerations of sufficient weight to override the harm that strategic development in this location would have on Green Belt purposes."

2006. Proposals put forward through the 2006 Cambridge Local Plan: land adjoining Peterhouse Technology Park proposed for housing / employment was dismissed by the Inspector on grounds that the land was located within the Green Belt, was open land outside the urban area, was not needed to supply housing, and that land should not be released to satisfy a possible shortage of employment land on an ad-hoc basis. Netherhall Farm was found to be a sustainable location for development but dismissed because of its importance to the setting of the City and there was no need to release from the Green Belt to make up the supply of housing for Cambridge. The Inspector concluding: "Even if development were to be limited to the western part of the site, the open land of that part of the site would be lost, and this land is well seen in the foreground in views from Lime Kiln Hill and Worts Causeway. The land is seen more distantly in views from the Gog Magog Hills. In some of the relevant views the site is part of the green foreground in wider prospects over the urban area. The site is important to the setting of the City and should remain part of the Green Belt."

There are no significant planning applications.

Level 1 Part A: Strategic Considerations		
Conformity with the Counci	l's Sustainable Development	t Strategy (SDS)
Criteria	Performance (fill with relevant colour R G B or RR R A G GG etc and retain only chosen score text)	Comments
Is the site within an area that has been identified as suitable for development in the SDS?	R = No G = Yes	
Flood Risk		
Criteria	Performance	Comments
Is site within a flood zone?	G = Flood risk zone 1	Green. Not in flood risk area.
Is site at risk from surface water flooding?	A = Medium risk	Amber: Fairly significant surface water flooding towards Cherry Hinton Road. Careful mitigation required which could impact on achievable site densities as greater level of green infrastructure required
Green Belt		
Criteria	Performance	Comments
What effect would the development of this site	See below	Development of this site would have a severe

have on Green Belt purposes, and other matters important to the special character of Cambridge and setting?		negative impact on the purposes of Green Belt affecting openness, setting and views.
To preserve the unique character of Cambridge as a compact and dynamic City with a thriving historic core	Distance from edge of the defined City Centre in Kilometres to approximate centre of site around 5km	Red: Development in this location would increase distance from edge to centre.
To prevent communities in the environs of Cambridge from merging into one another and with the City.	G = No impact	Green: The proposed development site would not have an effect on coalescence.
To maintain and enhance the quality of the setting of Cambridge	RR = Very high and high impacts	Red, Red: The setting of the City would be severely negatively impacted by development by compromising the openness of the area and interrupting views.
Key views of Cambridge / Important views	R = Significant negative impact from loss or degradation of views.	Red: The proposed development site would extend up the easternmost slope of the chalk hills to the southwest of the City and would be visible from all directions and would have a severe negative impact.
Soft green edge to the City	R = Existing high quality edge, significant negative impacts incapable of mitigation.	Red: The site is isolated and divorced from the existing edge. The existing high quality soft green edge would be negatively impacted if development occurred on the site.
Distinctive urban edge	G = Not present	Green: No effect on distinctive urban edge.
Green corridors penetrating into the City	G = No loss of land forming part of a green corridor / significant opportunities for enhancement through creation of a new green corridor	Green: There would be no loss of land associated with a recognised green corridor.
The distribution, physical separation, setting, scale and character of Green Belt villages (SCDC only)	A = Negative impacts but capable of partial mitigation	Amber: The proposed development may have an affect on Fulbourn village.

A landscape which has a strongly rural character	R = Significant negative impacts incapable of satisfactory mitigation	Red: The landscape is strongly rural despite being on the urban edge. Development would have a severe negative impact.
Overall conclusion on Green Belt	RR = Very high and high impacts	Red, Red: Development of this site would have a severe negative impact on the purposes of Green Belt affecting openness, setting and views.
Impact on national Nature (	Conservation Designations	
Criteria	Performance	Comments
Would allocation impact upon a Site of Special Scientific Interest (SSSI)?	A = Site is on or adjacent to an SSSI with negative impacts capable of mitigation	Amber. Adjoins the Gog- Magog SSSI to the south.
Impact on National Heritage		
Criteria	Performance	Comments
Will allocation impact upon a Scheduled Ancient Monument (SAM)?	G = Site is not on or adjacent to a SAM	Green. No
Would development impact upon Listed Buildings?	G = Site does not contain or adjoin such buildings, and there is no impact to the setting of such buildings	Green. No
Part B: Deliverability and V		Commonto
Criteria Is the site allocated or	Performance G = Site is not within an	Comments Green: This site does not
safeguarded in the Minerals and Waste LDF?	allocated or safeguarded area.	fall within a Minerals Safeguarding Area; a Waste Water Treatment Works or Transport Zone Safeguarding Area; or a Minerals or Waste Consultation Area.
		The adopted Core Strategy, Policy CS16, identifies Cambridge south as a Broad Location for a new Household Recycling Centre (HRC). This area falls within this broad location. Policy CS16 requires major developments to contribute to the provision of HRCs, consistent with the adopted RECAP Waste Management Guide.

		O - marilla cati
		Contributions may be required in the form of land and / or capital payments. This outstanding infrastructure deficit for an HRC must be addressed, such infrastructure is a strategic priority in the NPPF.
Is the site located within the Cambridge Airport Public Safety Zone (PSZ) or Safeguarding Zone?	A = Site or part of site within the SZ	Amber: Entire site in SZ. 40% within zone for consultation on any structure greater than 10m AGL.
Is there a suitable access to the site?	A = Yes, with mitigation	Amber: Yes with mitigation
Would allocation of the site have a significant impact on the local highway capacity?	A = Insufficient capacity.  Negative effects capable of appropriate mitigation.	Amber: Insufficient capacity. Negative effects capable of appropriate mitigation.
		This site is of a scale that would trigger the need for a Transportation Assessment (TA) and Travel Plan (TP), regardless of the need for a full Environmental Impact Assessment.
		S106 contributions and mitigation measures will be required where appropriate. Any Cambridge Area Transport Strategy or other plans will also need to be taken into account.
		Roads in the area are narrow with limited capacity. Need to consider bus gate on Worts Causeway, improvements to local roads to accommodate additional movements, and impact on the Hospital roundabout and Granhams Road & Babraham Road junctions.
Would allocation of the site have a significant impact on the strategic road network capacity?	A = Insufficient capacity.  Negative effects capable of appropriate mitigation.	Amber: Insufficient capacity. Negative effects capable of appropriate mitigation.
		With regard to the A14 the Department for Transport

La the gite part of a larger	A. Como impost	announced in July that the A14 improvement scheme has been added to the national roads programme. Design work is underway on a scheme that will incorporate a Huntingdon Southern Bypass, capacity enhancements along the length of the route between Milton Interchange to the North of Cambridge and Huntingdon, and the construction of parallel local access roads to enable the closure of minor junctions onto the A14. The main impact, in relation to Grange Farm and other potential Local Plan sites, is that existing capacity constraints on the A14 between Cambridge and Huntingdon will be removed. The funding package and delivery programme for the scheme is still to be confirmed, and major development in the Cambridge area, which will benefit from the enhanced capacity, will undoubtedly be required to contribute towards the scheme costs, either directly or through the Community Infrastructure Levy. The earliest construction start would be 2018, with delivery by the mid-2020s being possible.
Is the site part of a larger site and could it prejudice development of any strategic sites?	A = Some impact	Amber. Yes, Site SC284 is adjacent to City Council site CC911, but both can potentially utilise different access points.
Are there any known legal issues/covenants that could constrain development of the site?	G = No	Green: None known that would delay development coming forward. The site is in multiple ownership.
Timeframe for bringing the site forward for development?	G = Start of construction between 2011 and 2016	Green: SHLAA Call for Sites 2011 –submission on behalf of

		developer/landowner - The first dwellings be completed on site 2011-16
Would development of the site require significant new / upgraded utility infrastructure?	A = Yes, significant upgrades likely to be required, constraints capable of appropriate mitigation	Amber:  Electricity - Not supportable from existing network.  Significant reinforcement and new network required.
		Mains water - The site falls within the Cambridge distribution zone of the Cambridge Water Company (CWC), within which there is a minimum spare capacity of 3,000 properties based on the peak day for the distribution zone, less any commitments already made to developers. There is insufficient spare capacity within the Cambridge distribution zone to supply the total number of proposed properties which could arise if all the SHLAA sites within the zone were to be developed. CWC will allocate spare capacity on a first come first served basis. Development requiring an increase in capacity of the zone will require either an upgrade to existing boosters and/or a new storage reservoir, tower or booster plus associated mains.  Gas – Cambridge is
		connected to the national gas grid. A development of this scale would require substantial network reinforcement.
		Mains sewerage - There is sufficient capacity at the Cambridge works to accommodate this development site. The sewerage network is approaching capacity and a pre-development

		assessment will be required to ascertain the specific capacity of the system with regards to this site. If any mitigation is deemed necessary this will be funded by the developer.
Would development of the site be likely to require new education provision?	A = School capacity not sufficient, constraints can be appropriately mitigated	Amber: County Education comments awaited. Expect appropriate education provision to be made. For smaller sites this is likely to be off site.

Level 2		
Accessibility to existing centres and services		
Criteria	Performance	Comments
How far is the site from the nearest District or Local centre?	R = >800m	Red: Site is further than 800m from nearest Local Centre.
How far is the nearest health centre or GP service in Cambridge?	R = >800m	Red. Site is over 800m from nearest health centre or GP service.
Would development lead to a loss of community facilities?	G = Development would not lead to the loss of any community facilities or appropriate mitigation possible	Green. No
How well would the development on the site integrate with existing communities?	R = Limited scope for integration with existing communities / isolated and/or separated by non-residential land uses	Red: Site is isolated from existing communities with limited opportunities to facilitate community integration.
How far is the nearest secondary school?	A = 1-3km	Amber. Northern edge of site is within 1km of Netherhall School with the remainder between 1 and 3km (Coleridge Community College, St Bede's Inter-Church Comprehensive School and Netherhall School)
How far is the nearest primary school?	City preference:  R = >800m	Amber. Site is between 1 and 3km from Colville Primary School, Fawcett Primary School, Queen Emma Primary
	SCDC:	School Stapleford Community Primary School, Spinney

	A = 1-3 km	Primary School, Morley
		Memorial Primary School, Queen Edith Community Primary School and Ridgefield Primary School.
Would development protect the shopping hierarchy, supporting the vitality and viability of Cambridge, Town, District and Local Centres?	G = No effect or would support the vitality and viability of existing centres	Green. The site is too small to support a new Local Centre by itself, but it could not be developed without the development of Site 911, which is much larger and would be able to support a Local Centre. The nearest Local Centre is Wulfstan Way, which is a relatively small Local Centre and greater than 800m away. The distance to Wulfstan Way and the potential size of the new population if sites 911 and 284 were brought forward would merit a new Local Centre, which would be unlikely to have an impact on the existing hierarchy.
Accessibility to outdoor fac		
Criteria	Performance	Comments
Would development result in the loss of land protected by Cambridge Local Plan policy 4/2 or South Cambridgeshire Development Control policy SF/9? (excluding land which is protected only because of its Green Belt status).	G=No	Green: Site is not protected open space or has the potential to be protected
If the site is protected open space can the open space be replaced according to	R=No G=Yes	Not applicable
CLP Local Plan policy 4/2 Protection of Open Space or South Cambridgeshire Development Control policy SF/9 (for land in South Cambridgeshire)?  If the site does not involve	G = Assumes minimum on-	Green: No obvious constraints

facilities and achieve the minimum standards of onsite public open space provision?		
Supporting Economic Grov		
Criteria	Performance	Comments
How far is the nearest main employment centre?	A = 1-3km	Amber. Northern edge of site is within 1km of an employment centre with the remainder between 1 and 3km
Would development result in the loss of employment land identified in the Employment Land Review?	G = No loss of employment land / allocation is for employment development	Green. Development would not lead to the loss of employment land identified in the Employment Land Review.
Would allocation result in development in deprived areas of Cambridge?	G = Within or adjacent to the 40% most deprived Local Super Output Areas (LSOA) within Cambridge according to the Index of Multiple Deprivation 2010.	Green. Site in The Shelfords and Stapleford LSOA 8292: 3.62 and adjacent to Cherry Hinton LSOA 7960: 20.41 (within 40% most deprived LSOA) and Queen Edith's LSOA 7995: 3.99
Sustainable Transport		
Criteria	Performance	Comments
What type of public transport service is accessible at the edge of the site?	A = service meets requirements of high quality public transport in most but not all instances	Amber: At present, and despite being close to the Babraham Road Park & Ride, the site does not meet the Local Plan (Policy 8/7) definition of high quality public transport.
How far is the site from an existing or proposed train station?	R = >800m	Red. More than 800 metres.
What type of cycle routes are accessible near to the site?	A = Medium quality off-road path.	Amber - if a crossing over Cherry Hinton Rd provided and a link through the Park & Ride site, then through site CC911/CC929 to an improved Babraham Rd off-road path. Otherwise Red Red
SCDC Would development reduce the need to travel and promote sustainable transport choices:	GG = Score 19-24 from 4 criteria below	Total Score = 20

Distance for cycling to City Centre		
Air Quality, pollution, conta	mination and noise	
Criteria	Performance	Comments
Is the site within or near to	G = >1000m of an AQMA,	Green. Major Development
an AQMA, the M11 or the	M11, or A14	Environmental Impact
A14?		Assessment required to
		assess likely major transport
		impact. Outside the Air Quality
		Management Area but air
		quality assessment required.
		More than 1000m from an AQMA, M11 or A14.
Would the development of	A = Adverse impact	Amber: Adverse impact
the site result in an adverse	71 = 71dVC13C IIIIpact	Amber: Adverse impact
impact/worsening of air		
quality?		
Are there potential noise	A = Adverse impacts	Amber. The North of the site is
and vibration problems if	capable of adequate	close to Fulbourn Road and
the site is developed, as a	mitigation	Limelink Road runs the
receptor or generator?		western half of the site.
		Traffic noise will need assessment in accordance
		with PPG 24 and associated
		guidance. The impact of
		existing noise on any future
		residential in this area is a
		material consideration in
		terms of health and well being
		and providing a high quality
		living environment. However
		residential use is likely to be
		acceptable with careful noise
Are there potential light	G = No adverse effects or	mitigation Green:
pollution problems if the site	capable of full mitigation	GIGGII.
is developed, as a receptor	- Pasis S. Tall Hilligation	
or generator?		
Are there potential odour	G = No adverse effects or	Green: No adverse effects for
problems if the site is	capable of full mitigation	residential use
developed, as a receptor or		
generator?		
Is there possible	A = Site partially within or	Amber: Part of this site is
contamination on the site?	adjacent to an area with a	adjacent to an area of
	history of contamination, or capable of remediation	unknown filled land. This
	appropriate to proposed	could be dealt with by condition.
	appropriate to proposed	CONTUILION.

	development		
Protecting Groundwater	Protecting Groundwater		
Criteria	Performance	Comments	
Would development be within a source protection zone? Groundwater sources (e.g. wells, boreholes and springs) are used for public drinking water supply. These zones show the risk of contamination from any activities that might cause pollution in the area.	G = Not within SPZ1 or allocation is for greenspace	Green	

Criteria	Performance	Comments
Would allocation impact upon a historic park/garden?	G = Site does not contain or adjoin such areas, and there is no impact to the setting of such areas	Green. No.
Would development impact upon a Conservation Area?	G = Site does not contain or adjoin such an area, and there is no impact to the setting of such an area	Green. No.
Would development impact upon buildings of local interest (Cambridge only)	G = Site does not contain or adjoin such buildings, and there is no impact to the setting of such buildings	Green. No.
Would development impact upon archaeology?	A = Known archaeology on site or in vicinity	Amber. There is extensive evidence for prehistoric and Roman activity in the area including finds of prehistoric date, ring ditch remains of Bronze Age burial mounds, cropmarks showing enclosures of probable late prehistoric and/or Roman date. The site is also bounded by a Roman road to the north. Further information would be necessary in advance of any planning application for this site.  Results of pre- determination evaluation to be submitted with any planning application to inform a planning decision.

Making Efficient Use of Land			
Criteria	Performance	Comments	
Would development lead to	A = Minor loss of grade 1	Amber. Majority of site	
the loss of the best and	and 2 land.	(15.5ha) on Grade 2 land with	
most versatile agricultural		a small area on Grade 3.	
land?			
Would development make	R = No	Red. No.	
use of previously developed			
land (PDL)? (CITY)			
Would development make	A=No	Amber. No.	
use of previously developed			
land (PDL)? (SCDC)			
Biodiversity and Green Infra	astructure		
Criteria	Performance	Comments	
Would development impact	R = Contains or is adjacent	Red. County Wildlife Site -	
upon a locally designated	to an existing site and	Roadside verges of Limekiln	
wildlife site i.e. (Local	impacts incapable of	Road & Worts Causeway are a	
Nature Reserve, County	appropriate mitigation	County Wildlife Site as is	
Wildlife Site, City Wildlife	,, ,	Netherhall Farm. Local Nature	
Site)		Reserve – Adjoins	
		Beechwoods LNR to south.	
Does the site offer	R = Development involves	Red. Site falls within an area	
opportunity for green	a loss of existing green	identified for landscape scale	
infrastructure delivery?	infrastructure which is incapable of appropriate	habitat and green infrastructure enhancement in	
	mitigation.	the 2011 Cambridgeshire GI	
	miligation.	Strategy. However, the	
		proximity of this site to the	
		Beechwood LNR is llikely to	
		represent a significant	
		detrimental influence.	
Would development reduce	R = Development would	Red: -Presence of protected	
habitat fragmentation,	have a negative impact on	species - Greatest impact	
enhance native species,	existing features or	likely to be from the extensive	
and help deliver habitat	network links incapable of	loss of open farmland leading	
restoration (helping to	appropriate mitigation	to impact upon farmland	
achieve Biodiversity Action		species including brown hare	
Plan targets?)		and farmland birds. Protected	
		road verges exist south of the	
		site which may be impacted	
		upon if road improvement	
		schemes are needed.	
		Opportunity for habitat	
		linkage/enhancement/restorati on – includes new woodland	
		planting, new and reinforced	
		hedgerows, buffering of and	
		extensions to grassland	
		habitats and the creation of	
		new ponds.	
		<u> </u>	
Are there trees on site or	G = Site does not contain	Green. None in South	

immediately adjacent	or adjoin any protected	Cambridgeshire	
protected by a Tree	trees		
Preservation Order (TPO)?			
Any other information not captured above?			
Conclusions			
Cross site comparison			
Level 1 Conclusion (after	R = Significant constraints	Red:	
allowing scope for	or adverse impacts	<ul> <li>Very significant impact on</li> </ul>	
mitigation)		Green Belt purposes	
Level 2 Conclusion (after	R = Significant constraints	Red:	
allowing scope for	or adverse impacts	-Site is not near to local	
mitigation)		facilities such as district / local	
,		centre & GP surgery.	
		-Also scores badly on a local	
		wildlife site, green infrastruture	
		and biodiversity.	
Overall Conclusion	R = Site with no significant	Red: Site with no significant	
	development potential	development potential	
	(significant constraints and	(significant constraints and	
	adverse impacts)	adverse impacts)	
	au rondo impadio)		
Viability feedback (from	R = Unlikely to be viable,	Sites ranked A or G will be	
consultants)	A = May be viable	taken forward for viability	
	G = Likely to be viable	assessment by consultants	
	G = Entory to be viable	acceptation by concentants
